Your mirror, your partner: Deknudt Mirrors

For 70 years Deknudt Mirrors have been making the **best and most beautiful mirrors for you**. Mirrors lovingly produced by our own skilled professionals using the best European glass. Created by our designers working either alone or together with international designers. Alongside this we offer you our own unique selection from what the world has to offer.

Your mirror is a valued element in your home.

Consciously and unconsciously you will see it every day. So, choose a nice mirror. It is a part of your interior and contributes to creating the atmosphere which makes you feel at home. It brings light and so helps you to create the feeling of more space; it illuminates and reflects your favourite corner in an unique way. It will make you look good before you go out.

We at Deknudt are inspired by aesthetics and motivated by **quality**. We guarantee that quality now with an even longer **7 year warranty** on each mirror that we produce.

This 2017 catalogue is primarily an **inspiring lookbook**. You will find all the information and the technical details of each mirror in the catalogue index, and much more on our **new website www.deknudtmirrors.com**.

When it comes to mirrors, we are very pleased to be at your service.

A family affair

Every story has a beginning. Before you know it, you are writing a book with many chapters and with even more pages.

One day in 1946, Frans Deknudt decided to make a mirror. A mirror that was **more beautiful, more innovative and of higher quality** than the ones available on the market at that time.

Seventy years later, Deknudt Mirrors has turned into a company with 100 proud employees. In 1986 Frans's son, Francis Deknudt, took over the helm. And in 2012 **the third generation**, led by Jan Deknudt, joined the company.

Of course a lot has changed over the years. However, the **main theme** of the story has always remained the same: offering you, our customer, **a fresh, beautiful and high-quality** mirror.

We do that by working closely together. In a warm environment, in which each employee is respected and appreciated. By finding the right balance between gut feeling and reason. And by combining tradition and experience with true innovation.

NL

A family affair

Elk verhaal heeft een begin. En voor je het goed beseft, schrijf je aan een boek met veel hoofdstukken en nog meer bladzijden.

Op een dag in 1946 besloot Frans Deknudt een spiegel te maken. Een spiegel die **mooier, meer vernieuwend en kwaliteitsvoller** was dan wat hij op de markt vond.

70 jaar later is Deknudt Mirrors tot een onderneming uitgegroeid met 100 fiere medewerkers. Sinds 1986 heeft de zoon van Frans, Francis Deknudt, het roer overgenomen. En in 2012 is met Jan Deknudt ook de **derde generatie** tot de onderneming toegetreten.

Natuurlijk is er doorheen de jaren heel wat veranderd. Maar het **hoofd-thema** van het verhaal is altijd hetzelfde gebleven: u, onze klant, een **frisse, oogstrelende en kwaliteitsvolle spiegel aanbieden**.

Dat doen we door goed samen te werken. In een warme omgeving, waarin elke medewerker gerespecteerd en gewaardeerd wordt. Door buikgevoel aan ratio af te toetsen. En door traditie en ervaring aan ware innovatie te koppelen.

FR

A family affair

Toute histoire a un commencement. Et avant que l'on s'en rende compte, on écrit un livre qui comporte de nombreux chapitres, et des pages à n'en plus finir.

Un beau jour en 1946, Frans Deknudt décida de fabriquer un miroir. Un miroir qui était **plus beau, plus innovant** et dont la **qualité** était **supérieure** à celle qu'il trouvait sur le marché.

Soixante-dix ans plus tard, Deknudt Mirrors s'est développé pour devenir une entreprise comptant 100 fiers collaborateurs. Depuis 1986, le fils de Frans, Francis Deknudt, a repris le flambeau. Et en 2012, la **troisième génération** a également rejoint l'entreprise, en la personne de Jan Deknudt.

Naturellement, bien des choses ont changé au fil des ans. Mais le **thème principal** de l'histoire est toujours resté le même : vous offrir à vous, notre client, un **miroir actuel, charmant et de qualité**.

Nous le faisons grâce à une bonne collaboration. Dans un environnement chaleureux, dans lequel chaque collaborateur est respecté et apprécié. En confrontant notre intuition à la raison. Et en couplant la tradition et l'expérience à la véritable innovation.

DE

Ein Familienunternehmen

Jede Geschichte hat einen Anfang. Und ehe man es erkennt, schreibt man ein Buch mit vielen Kapiteln und sogar noch mehr Seiten.

An einem gewissen Tag im Jahre 1946, entschied sich Frans Deknudt, einen Spiegel herzustellen: einen Spiegel, der **schöner, erneuernder und hochkarätiger** war als diese, die er im Markt fand.

70 Jahre später hat sich Deknudt Mirrors entwickelt zu einem Unternehmen, das 100 stolze Mitarbeiter beschäftigt. Seit 1986 hat der Sohn von Frans, Francis Deknudt, das Ruder übernommen. Und im Jahre 2012 ist mit Jan Deknudt auch die **dritte Generation** in das Unternehmen eingetreten.

Selbstverständlich hat sich durch die Jahre hindurch vieles verändert. Das **Kernthema** der Geschichte ist aber immer unverändert geblieben: Ihnen, unser Kunde, einen **frischen, fürs Auge wohlthuenden und hochkarätigen Spiegel anzubieten**.

Das machen wir, in dem wir gut zusammenarbeiten. In einer Umgebung, in der jeder Mitarbeiter respektiert und geschätzt wird. Wo Bauchgefühl und Ratio aufeinander abgestimmt werden. In dem Tradition und Erfahrung mit wahrer Innovation verbunden wird.

Cutting glass ▶

We buy glass of the best quality in large surfaces. We cut these sheets of glass with a special CNC controlled machine. The sometimes heavy pieces are separated and sorted depending on the further processing that is planned. Work for tough men with at the same time an exceptional Fingerspitzengefühl.

△ Silvering

We only cover the glass with a thin layer of silver. In this way we, as pioneers, gave short shrift to the polluting copper layer. For the silvering, the proportion of the ingredients has to be exact. A large number of parameters need to be monitored closely. Over the past seventy years we have become experts in this field.

△ Finishing the edges

Grinding We grind the cut edges with a diamond polisher. Result: a nice and smooth edge. With regard to form and finish, practically anything is possible: from straight to round and mat to shiny. At the end of the process the mirrors are extensively washed and checked for any possible imperfections.

Bevelling At the border of the mirror we create an inclined edge by means of bevelling. This is possible in different widths and different angles. After that the inclined edge is polished in order to obtain the 'brilliant' effect on the finished mirror. A bevel provides our mirrors with an extra touch.

Also see production movie
"Deknudt Mirrors" on Youtube
and on our website
www.deknudtmirrors.com

△ Making moulds & injecting

Some of our mirrors get a decorative frame manufactured by us in polyurethane. Precision work once more, as the tiniest mistake in the mould is immediately visible on the frame. Polyurethane has many advantages, including the fact that large frames are moulded in one piece, that it is a very light material and that it is not affected by moisture or heat.

Applying metal leaf △

Applying metal leaf or 'gold leaf' is a very painstaking and intense job. It requires a lot of insight, a high level of craftsmanship and tons of patience. The leaves have to be applied in exactly the right way and dust-free onto the previously protected and treated frame. The result: a frame that shines marvellously and reflects the light in a magnificent way.

Assembling & packing ▷

During the assembly we turn the various parts into an impeccable mirror. We pack the mirror in a carefully thought-out, exceptionally strong and ecological - no Styrofoam - packaging.

◁ Final warehouse

Although stocking up three collections of mirrors requires a lot of space and a well-oiled organisation, more than 85% of our mirrors are permanently in store in our warehouse. Our fit warehouse responsables make sure everything goes smoothly. It is mainly thanks to their excellent work that we are able to deliver our mirrors world-wide in a very quick way.

Also see production movie "Deknudt Mirrors" on Youtube and on our website www.deknudtmirrors.com

To go green

Doing business and taking care of our planet at the same time: it is possible. We offer some of the most environment-friendly mirrors available on the market.

The manufacturing process in our own European ateliers complies with all the strict **environmental legislations**. Furthermore, we try to make an extra effort to further **reduce** our **ecological footprint**.

And that is something that we all benefit from: us, you and the generations that are to follow.

- We only cover the glass with a thin layer of silver. In this way we, as pioneers, gave short shrift to the polluting copper layer.
- Over the last years our electricity consumption dropped by 25%. In this way, we were able to save around 580,000 kW or 580 MW, the equivalent of the energy consumption of more or less 150 average families per year.
- We catch the heavy metals from the water waste stream in filters and recycle them.
- Over the last years our tap water consumption decreased by no less than 30%, which is more than 5,000 m³. This equals the water consumption of more or less 170 people per year.
- We separate our waste products with the utmost care. They are then recycled as much as possible by renowned waste processors.

NL

Milieubewust

Ondernemen en goed zorgen voor de aarde: beide gaan perfect samen. U vindt bij ons een van de meest milieuvriendelijke spiegels op de markt.

De productie in onze eigen Europese ateliers beantwoordt aan alle **streng milieuwetgevingen**. Daarbovenop leveren we extra inspanningen om onze **ecologische voetafdruk** nog sterker te **verkleinen**.

En daar plukken we allemaal de vruchten van: wij, u en de generaties na ons.

- We bekleden het glas alleen met een zilverlaagje. We maakten op die manier, als pioniers, komaf met de vervuulende koperlaag.
- De laatste jaren daalde ons elektriciteitsverbruik met 25 %. We bespaarden zo 580.000 kW of 580 MW: het verbruik van om en bij 150 doorsnee gezinnen per jaar.
- De zware metalen uit de waterafvalstroom vangen we in filters op en recycleren we.
- De laatste jaren daalde ons verbruik van leidingwater met maar liefst 30 %. Meer dan 5.000 m³. Dit komt overeen met de waterconsumptie van om en bij 170 personen per jaar.
- We sorteren onze afvalstroom bijzonder zorgvuldig. Erkende afvalverwerkers recycleren die op hun beurt zo goed mogelijk.

FR

Environnement

Entreprendre tout en prenant bien soin de la planète : les deux sont parfaitement compatibles. Vous trouverez chez nous les miroirs les plus respectueux de l'environnement existant sur le marché.

La production dans nos propres ateliers européens répond à toutes les **réglementations environnementales** les plus sévères. Nous livrons en outre également des efforts supplémentaires, afin de **réduire** encore davantage **notre empreinte écologique**.

Et nous en récoltons tous les fruits: nous, vous et les générations qui nous suivront.

- Nous ne revêtitons le verre que d'une seule couche d'argent. Avec cette méthode, nous avons été pionniers en renonçant à la couche polluante de plomb.
- Pendant ces dernières années, notre consommation d'électricité a baissé de 25 %. Nous avons ainsi économisé 580.000 kW ou 580 MW, soit la consommation annuelle d'environ 150 familles moyennes.
- Nous récupérons les métaux lourds de nos eaux résiduelles dans des filtres, et nous les recyclons.
- Toujours pendant ces dernières années, notre consommation d'eau courante a baissé de pas moins de 30 %. Plus de 5.000 m³. Cela correspond à la consommation d'eau annuelle d'environ 170 personnes.
- Nous trions nos déchets avec le plus grand soin. Des entreprises de traitement des déchets agréées les recyclent ensuite le plus possible.

DE

Umwelt

Unternehmen und sich um die Umwelt kümmern: Beide gehen einwandfrei Hand in Hand. Bei uns finden Sie einen der umweltfreundlichsten Spiegel am Markt.

Die Herstellung in unseren europäischen Werkstätten entspricht jeder **strengen Umweltgesetzgebung**. Darüber hinaus geben wir uns viel Mühe um unseren **ökologischen Verpflichtungen** nachzukommen.

Dabei ernten wir alle die Früchte unserer Arbeit: Wir, Sie und auch die nächsten Generationen.

- Wir beschichten das Glas nur mit einer wSilberschicht. Als Vorreiter verzichtet wir auf diese Weise auf die verschmutzende Kupferschicht.
- In den letzten Jahren sank unser Elektrizitätsverbrauch um 25 %. Wir sparten so 580.000 kW bzw. 580 MW. Dabei geht es um den Verbrauch von etwa 150 durchschnittlichen Familien pro Jahr.
- Die Schwermetalle aus dem Abfallwasserstrom fangen wir in Filter auf und verwenden es wieder.
- Auch in den letzten Jahren sank unser Leitungswasserverbrauch um bis zu 30 %. Über 5.000 m³. Dies entspricht dem Wasserkonsum von etwa 170 Personen pro Jahr.
- Wir sortieren unseren Abfallstrom äußerst sorgfältig. Anerkannte Abfallbeseitigungsunternehmen veranlassen, dass dieser wiederum möglichst gut wiederverwertbar wird.

Designers

Ann Grymonpon ▷

Ann is one of the 2 in-house designers of Deknudt Mirrors. Intuitive, not too serious, out-of-the-ordinary, organic and simple are a few characteristics that stand out in my designs.

◁ Annemie Vanzieleghem

Annemie is one of the 2 in-house designers and head of the Design and R&D division of Deknudt Mirrors. Be open and receptive to new things. Curiosity is, to my mind, an important stimulus. The mysticism in mirrors has me captivated !

△ Karim Rashid

Karim Rashid is one of the most prolific designers of his generation. Over 3000 designs in production, over 300 awards and working in over 35 countries attest to Karim's legend of design. Karim's diversity affords him the ability to cross-pollinate ideas, materials, behaviors, aesthetics from one typology to the next, crossing boundaries and broadening consumer horizons.

△ MaDe Simon Desmet - Timothy Macken

MaDe is a product innovation and design studio that has been helping its clients for 7 years by focusing on improving the quality of life. "Next to the services for industrial clients, we do not want to lose the link with the pure design work. We enjoy working together with a manufacturer to develop interior objects. That is the reason why we were very happy with the collaboration with Reflect+ by Deknudt Mirrors to design and make an emotional object like a mirror."

◁ Roberto Paoli

Roberto Paoli is an architect and designer specialized in the small-scale design. He currently designs for prestigious brands of furniture and light industry such as Deknudt Mirrors, Ligne Roset, Artemide, Leucos and Nemo Cassina. While collaborating with famous companies, in 2013 he founds his own brand "Seminato Mercadante" with which he self-produces products characterized by a strong research, experimentation and innovation .

△ Arik Levy

Arik Levy considers himself as a designer "who feels". He continues having a considerable impact on our interior and exterior environment and his work consists of public sculptures, like the Rock, his masterpiece and environments of multiple usage. "Life is a system of signs and symbols", he says, or "nothing is what it seems".

◁ Jean-François D'Or

Jean-François designs simple and unpretentious objects without ostentation: user-friendly design with a refined and poetic undercurrent. His Loudordesign studio for industrial design is an international success. He was elected "Belgian Designer of the Year" in 2013.

△ Alain Gilles

Design as a second life. After studying Political Sciences and Marketing Management, Alain Gilles went on to work in the international financial world for 5 years. But one has to live his own life. So, he went back to studying Industrial design in France. He opened his own studio in late 2007 in order to pursue his own dreams and develop his personal approach to product design, furniture design, art direction and scenography. He has since started to collaborate with several international editors. Several of his products have been awarded international prizes. In 2012, he was named "Designer of the Year" in Belgium.

▷ Bart Lens ▷

The designs of Bart Lens excel in their simplicity and stimulate tangibly as well as visually. He is the founder of the studio Lens'Ass, where he works on architectural and interior design projects as well as on product and concept development.

◁ Stefan Schöning

In search of developing his identity, Stefan Schöning works in a lot of different fields with a variety of products and materials. Mirrors are intriguing and centuries-old. They are irreplaceable and can be combined with any other material. Hence the motto of his studio: diversity feeds creativity.

▷ Charles Bateson ▷

Charles Bateson started his own business around 1995. He is generally known for including the best of classic, traditional and contemporary looks. In reality, the final feel of the job is dictated by the client, the building and the geography of the job. He has designed traditional country houses and city homes in the United Kingdom where he is based as well as around the world in cities such as Cairo, Geneva and Hong Kong. No project is too big, too small or too unusual to benefit from his expertise.

△ Marc Th. van der Voorn

Marc Th. van der Voorn is a Dutch designer based in Utrecht, working in the field of product design. His approach is practical, hands on and collaborative. His aim is to develop consumer products in collaboration with committed manufacturers and brands. "A team effort is needed to create a remarkable product that stands out".

◁ Aurélie Van Iseghem

Aurélie is a Belgian industrial product designer who did an internship with Deknudt Mirrors in 2015. She made a great impression and we took 3 mirrors of her in collection.

A piece of advice

Cleaning the mirror

A clear mirror is nicest to look at. The best way to clean your mirror is to polish it with a cloth that was slightly moistened with hot water. Then rub it dry and your mirror will shine like it used to. You should avoid the use of glass cleaning products. They are too aggressive for the reflecting layer of silver.

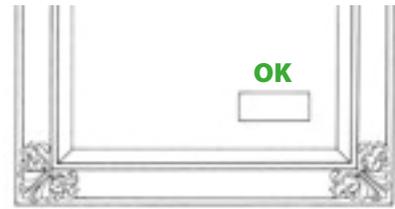

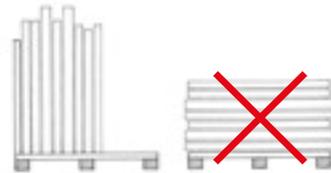

Exceptionally, the mirror can be cleaned by means of a little bit of cleaning agent. In that case the mirror should be carefully rubbed dry afterwards, including the edges, so there is no corrosive product remaining on the mirror.

Storage

Store the mirrors in an upright position and in the original packaging.

Label

Do not stick any labels to the frame of the mirror. Attach them to the mirror glass instead. This will allow you to peel the label off more easily.

Warme adviezen

Spiegel poetsen

Een nette spiegel schept het grootste genot. Het beste reinigingsmiddel is een doekje dat licht bevochtigd is met warm water. Even droogwrijven en de spiegel blinkt weer als van te voren.

Glasreinigingsproducten zijn hier niet op hun plaats. Ze zijn te agressief voor de weerkaatsende zilverplaat. Uitzonderlijk kan de spiegel gereinigd worden met een beetje poetsmiddel. In dat geval moet de spiegel nadien zorgvuldig worden drooggewreven, zeker ook de randen, zodat geen corrosief product achterblijft.

Stockeren

Stockeer de spiegels verticaal in de originele verpakking.

Etiket

Kleef geen etiketten op de omlijsting van de spiegel. Gebruik daarvoor het spiegelglas. Hier krijg je het etiket makkelijk weer los.

Quelques précieux conseils

Nettoyer un miroir

Un miroir propre procure le plus grand des plaisirs. Un chiffon légèrement humidifié avec de l'eau chaude constitue le meilleur moyen de le nettoyer. Une fois frotté pour être séché, le miroir brille à nouveau comme avant. Les produits de nettoyage du verre ne conviennent pas. Ils sont trop agressifs pour la couche d'argent réfléchissante.

Exceptionnellement, le miroir peut être nettoyé à l'aide d'un peu de produit détergent. Dans ce cas, le miroir doit ensuite être soigneusement séché, certainement aussi ses bords, de manière à ce qu'aucun produit corrosif ne subsiste.

Le stockage

Stockez les miroirs verticalement, dans leur emballage original.

L'étiquette

Ne collez pas d'étiquettes sur le cadre du miroir. Utilisez le verre du miroir à cette fin. Vous parviendrez plus facilement à y enlever l'étiquette.

Empfehlungen

Spiegel reinigen

Einen sauberen Spiegel genießen Sie am meisten. Das beste Reinigungsmittel ist ein mit etwas warmem Wasser angefeuchtetes Tuch. Kurz trockenreiben, und der Spiegel glänzt wieder wie zuvor. Glasreinigungsprodukte sind hier nicht gefragt. Für die Versilberung sind diese Mittel zu ätzend. Ausnahmsweise lässt sich der Spiegel mit ein wenig Putzmittel reinigen. In diesem Fall muss der Spiegel bzw. müssen insbesondere die Kanten nachträglich sorgfältig trockengerieben werden, so dass kein korrosionsförderndes Produkt zurückbleibt.

Lagern

Lagern Sie die Spiegel senkrecht in der Originalverpackung.

Aufkleber

Keine Aufkleber auf die Einrahmung des Spiegels kleben. Verwenden Sie dafür das Spiegelglas, von dem der Aufkleber einfach zu entfernen ist.

STARLED

Starled is a unique idea, a mirror that will brighten up both your home and your garden. It is a technologically intelligent design, at the same time very contemporary and elegant. Starled can stand, lie down or hang on the wall. At night, it glows with ambient light showing why this mirror is called Star-Led.

The colour and intensity of the light can easily be adjusted by remote control and the internal battery is charged via USB or an induction charger.

Above all, Starled is a real mirror that is completely waterproof for outside use. Delivered in display packaging.

FILL

Due to the fact that we silver our mirrors in our own factory, we are able to make partially-silvered mirrors: a combination of mirrored and transparent parts on one surface. Combining this technique with thoughtful graphic design has produced a beautiful and subtle collection. The simplicity of the concept allows these mirrors to remain accessible to a wide audience.

CORD

In geometry, the line connecting two points of a circle, without passing through its centre, is defined as the cord. The CORD mirror is a design from Roberto Paoli, who took inspiration from the geometric work of Kepler. Paoli respected the proportions chosen by Kepler and emphasized the difference between the two sections of the circle with different colours.

SLIDE

This mirror series is designed by the Dutch designer Marc Th. van der Voorn, who lets the mirror slide into a slot in a folded and powder-coated metal plate.

The contemporary and very simple design looks tight and fits perfectly in a modern interior. Those who love simplicity and functionality will appreciate these designs.

RADIUS

A collection of mirrors in very nicely-lacquered MDF frames enrich our young living mirror range. Used individually or in a combination of different colors and sizes, they can fill your wall in a playful way. Black and white, trendy blue and yellow and even oak veneer: plenty of choice.

The mirror floats within its frame giving a stylish detail.

MESA COLLECTION

MESA

Occasional furniture is popular.

The sleek black metal frame is powder-coated and two different tops are available. The mirror top is bonded on a black MDF substrate. The black/grey top is double-sided with chic smoked-grey mirror on one side and stylish black glass on the other. This reversible top allows you to select and change the colour according to your taste. The Mesa table collection is very easy to combine with all styles of mirrors.

TESORO

Meaning "Treasure"

Tesoro is a real jewel on the wall. A mirror with many facets reflecting its own beauty, not too modest but not too boastful either. The refined beveled mirror parts provide a wonderful reflection of light in the room. In the Black version of Tesoro the black mirror parts accentuate its square shape.

BASIC COLLECTION

it's all in the name: basic.

Basic shapes, nice and balanced sizes and very appropriate finishes make this mirror family one of the most important in our collections. The gold, copper and silver version are masterfully finished with metal leaf at the back of a pure transparent glass plate.

On top, a clear mirror with an elegant small bevel makes the whole irresistible. The youngest member of this family is the more contemporary grey mirror version.

NICK

The line game in the frame is contemporary, the design looks like a folded piece of paper, a motif that is applied in decorative pieces like vases, crockery, ... The Polyurethane frame looks elegant and yet gives an impact as a big object. By means of the shiny gold or silver decoration the light is reflected in fragments, thus emphasizing the design of the frame.

In the gold and silver finish, this contemporary mirror fits in lots of styles. The black and white mat version is rather modern and graphic.

CONVEX MIRROR

Having a convex mirror in your home reflects a sense of mystery. Convex mirrors do have a real history. They played an important role in the running of high class households. The convex mirror allowed the butler to oversee the progress of supper, whilst keeping a discrete distance from the guests. It was a helpful tool in keeping an eye on the situation.

Less well-known is the rather enchanting name the French have for the convex mirror: 'oeil de sorcière', the eye of the sorceress. In France, and elsewhere in Northern Europe in the middle ages, the convex mirror was attributed magical powers. It was thought that, like a huge eye, the convex mirror could observe all around it and repel evil forces.

ANNA

Baroque, voluted, rich, curvy... Many adjectives can be used to describe this classical mirror.

Four separate corner pieces in polyurethane are joint together on the mirror plate.

Covered in artisanal gold or silver leaf with the finest patinas, it appears as a masterpiece in a classical style. Finished in calm rustic colors, it fits more in a rural surrounding.

The Anna mirrors are versatile in style and application.
